5•	On this same hill where the tank maneuvers are carried out, there is a small building in which are stored materiel from the town's gun and ammunition factory, where guns are bored prior to testing. These tests are made on the same hill, near this building. At this same location, bombs of an unknown type were tested.    after the explosions, holes about one meter deep and about two meters in diameter were made. Hand grenades and rifles were also often tested here. The whole area around this building was badly devastate from the testing of materiel produced by the weapons and munitions factory. The testing was carried out every 2-3 days.	d
	Artillery Unit in Kazenluk	
5.	The barracks of an unidentified artillery unit, strength about 500 mem, are located approximately 500 meters east of the barracks of the tank units, on the north side of the new road to Koprinka and Kalofer, inside the town.	
? •	The barracks area is approximately 400x200 meters in size, includes 5-6 building and is enclosed by a brick wall approximately two meters high.	s 25X1
